

# welcome home.

Let's change the world.

## Backend Developer

At Runtastic we believe in helping people improve their fitness and overall health. Moreover, we believe in creating an exciting work environment in which we can thrive **personally, professionally...** and **even physically**. Team members from all over the world get together in our inviting offices to tackle **unusual and fascinating challenges** every day. We offer **a number of benefits** and let our creativity run wild on our **Days of New Ideas**. Because only if our employees are happy can our hundreds of millions of users be happy too.

 **FULL TIME**

 **LINZ, VIENNA, SALZBURG**

### YOUR MISSION

Ready to change the world with code? With hundreds of millions of users we face the challenge of building a top-class backend infrastructure and applications every day. Our main tools of choice to scale our applications are *jRuby, Sinatra, Sidekiq, MySQL* and *MongoDB*. In your agile team, your tasks will include:

- Designing efficient and scalable backend services and APIs for our health and fitness applications
- Working together with your team to envision the next great features and applications of Runtastic
- Writing tests and releasing & monitoring your code
- Improving our growing codebase

With a proactive mindset there will be plenty of opportunities to bring in your own ideas to shape the future of Runtastic.

### YOUR PROFILE

- Experience writing robust, maintainable HTTP and REST APIs. First contact with *Ruby*.
- Knowledge of *SQL* and familiarity with *NoSQL* databases such as *MongoDB* or *Cassandra*.
- Ability to speak JSON (preferably JSON API) and REST to clients.
- Preferably, a degree in Information Technology, Software Engineering or a related field (higher technical institute or university)
- Very good German and good English skills OR very good English skills (written and spoken)
- Curious mindset, a team player and desire to work and live in Austria
